

ALEXANDER EVAN JEROME

Senior AI Product Manager

AlexEJerome@gmail.com | (410) 916-2343 | [linkedin.com/in/AlexEJerome](https://www.linkedin.com/in/AlexEJerome)
Washington, D.C. | Open to Relocation

PROFESSIONAL SUMMARY

Computer Science + Marketing trained AI Product Manager with 7+ years shipping production AI systems before mainstream adoption. Generated \$4M+ measurable business impact across 10M+ users globally at Fortune 500 scale through ML personalization platforms, GenAI creative campaigns, and enterprise-compliant AI architectures. **Unique technical & growth background enables seamless collaboration from data science teams to C-level stakeholders** while navigating complex AI governance and regulatory requirements.

PROFESSIONAL EXPERIENCE

Senior Product Manager, AI and Innovation Strategy | [Resonate](#)

September 2025 - December 2025

LLM-powered CDP delivering deep psychographic insights to Fortune 500, agency, and political and advocacy organizations

- **Developed and secured product leadership approval for strategic 3-year Agentic AI Roadmap**, expanding company focus from LLM audience segmentation to comprehensive agentic performance marketing suite capabilities
- **Won "Best Use of AI Award" for LLM-powered embedding analysis that accelerated audience segmentation from days to hours** and achieved deeper predictive insights for voter turnout and customer churn, securing roadmap adoption
- **Selected by leadership to establish AI capability framework**, authoring best practices documentation on LLM selection, prompt engineering methodology, and Claude platform optimization to accelerate organizational AI adoption

Product Manager, Global Growth | [Appian Corporation](#)

March 2022 – July 2024

Enterprise AI automation SaaS, Gartner Leader serving Fortune 500 clients

- **Delivered 50% increase in sales pipeline using AI tools** within 18 months across 3 global regions through integrated AI/ML optimization strategy combining 6Sense targeting, Metadata AI creative testing, and data-driven content optimization
- **Achieved 86% cost reduction through GenAI advertising initiatives** leveraging AI-generated creative content, with 172% conversion improvement through comprehensive A/B testing framework (\$300+ to under \$40 cost-per-lead)
- **Presented AI optimization strategies to CMO and CTO** demonstrating content and targeting improvements from Metadata and 6Sense implementations, securing executive approval for expanded AI tool adoption
- **Accelerated stalled iPaaS automation project** from 3-month delay to 2-week completion, increasing conversion rates by 31% through automated B2B lead processing and workflow optimization

Technical Product Manager, eCommerce | [Procter & Gamble](#)

October 2019 – February 2022

Consumer goods innovator developing AI-powered personalization platforms for 14 major brands and 10M+ users

- **Delivered AI-powered personalization platform (HairCode) 4 months ahead of schedule** saving \$2M development costs on 30-variable ML classification system by achieving fastest application security compliance approval in P&G USA
- **Shipped AI computer vision product recognition system to production in Kroger stores** using Google AutoML Vision API for in-store SKU recognition across thousands of products

- **Optimized Machine Learning-powered autobidding algorithm** collaborating with data science teams to achieve 23% sales target increase (\$2M+ revenue impact) and ROAS >2 across 12 major e-commerce platforms
- **Engineered novel PII protection system** for AI product ensuring GDPR & CCPA compliance while enabling anonymous user ID matching for hair sample analysis and AI-driven personalization
- **Orchestrated matrix organization of 40+ technical stakeholders** including agencies and contractors to deliver 300% website traffic increase across millions of users through coordinated SEO, paid search, and web development initiatives

EDUCATION

B.S. Computer Science & B.S. Marketing

University of Maryland, College Park (2019)

QUEST Product Management Honors Program

Continuing Education:

- Wharton Executive Education: Product Management & Strategy (2024)
- Databricks Academy: Generative AI Fundamentals Accreditation
- University of Maryland: Cybersecurity & AI Ethics Coursework

TECHNICAL SKILLS & AI EXPERIENCE

Technical AI Implementation: Large Language Models/LLMs (Claude/ChatGPT/Gemini, Claude Skills, Claude Code) | Langfuse | Google AutoML Vision | Python Data Science (Scikit-learn/Pandas/Seaborn) | MLOps & Model Deployment

AI/ML Product Leadership: Generative AI Strategy & Implementation | Machine Learning Classification Systems | Computer Vision Applications | Responsible AI Governance | AI Product Lifecycle Management | Responsible AI

Cross-Functional AI Leadership: Data Science Team Collaboration | AI Ethics & Compliance (GDPR/CCPA) | Cross-Functional Stakeholder Management | AI Product Strategy & Roadmapping

AI Product Optimization: A/B Testing Frameworks for AI | Conversion Optimization | Performance Analytics | AI UX Design | AI Risk Management | Automated Workflow Integration

Product Management Tools: Agile Scrum Methodologies | Jira | Asana | Tableau | Google Analytics | Confluence | Git Version Control | Salesforce Data Pipeline Integration
